SELECTED BIBLIOGRAPHY OF PUBLICATIONS  
HIGHLIGHTING AREAS OF RESEARCH EFFORT AT THE  
CENTER FOR ENERGY AND ENVIRONMENT RESEARCH

William Lawrence, Kenneth Soderstrom,  
Fernando Souto, and Allan Stoner

This document contains a selection of 31 publications which highlight some of the key research areas at the San Juan and Mayagüez sites of the Center for Energy and Environment Research. The included publications were drawn from a pool of nearly 100 submitted by CEER staff members for consideration. Since the authors' intent was to highlight research areas, usually only one publication was chosen to represent each research project. Not all research projects are included, but publications are found from many projects within the Energy, Chemical Process, Environmental, and Special Projects groups.
